Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-15, 34, 36, 37, and 44, drawn to a vending system, classified in class 221, subclass 2, or class 700, subclass 231.
 - II. Claims 16-29, 35, and 38-43 drawn to a vending method for determining whether a product is delivered, classified in class 221, subclass 21, or class 700, subclass 244.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I, III and I, are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another vending method which does not required the steps of providing the customer with a first or second alternative choices. In this case, the process claims can be practiced by another materially different apparatus which does not required the adjustment of the light source from the emitter(s).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 3651

Species I, the embodiment having the optical sensing arrangement per figure 1,^u and wherein the delivery of all products is prevented if a vending product is not detected;

Species II, the embodiment having the optical sensing arrangement per figure 7, and wherein the delivery of all products is prevented if a vending product is not detected;

Species III, the embodiment having the optical sensing arrangement per figure 7,^u and wherein the delivery of a set of products is prevented if a vending product is not detected;

Species IV, the embodiment having the optical sensing arrangement per figure 7, and wherein the delivery of a set of products is prevented if a vending product is not detected;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 16, and 24 appear to be generic with respect to the respective groupings.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3651

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
